Unlocking AI's True Value

We are a **cooperative bank**
group – with 125 years of history

Second largest retail
bank in Switzerland.

RAIFFEISEN

Headquartered in
St. Gallen with **700+**
branches

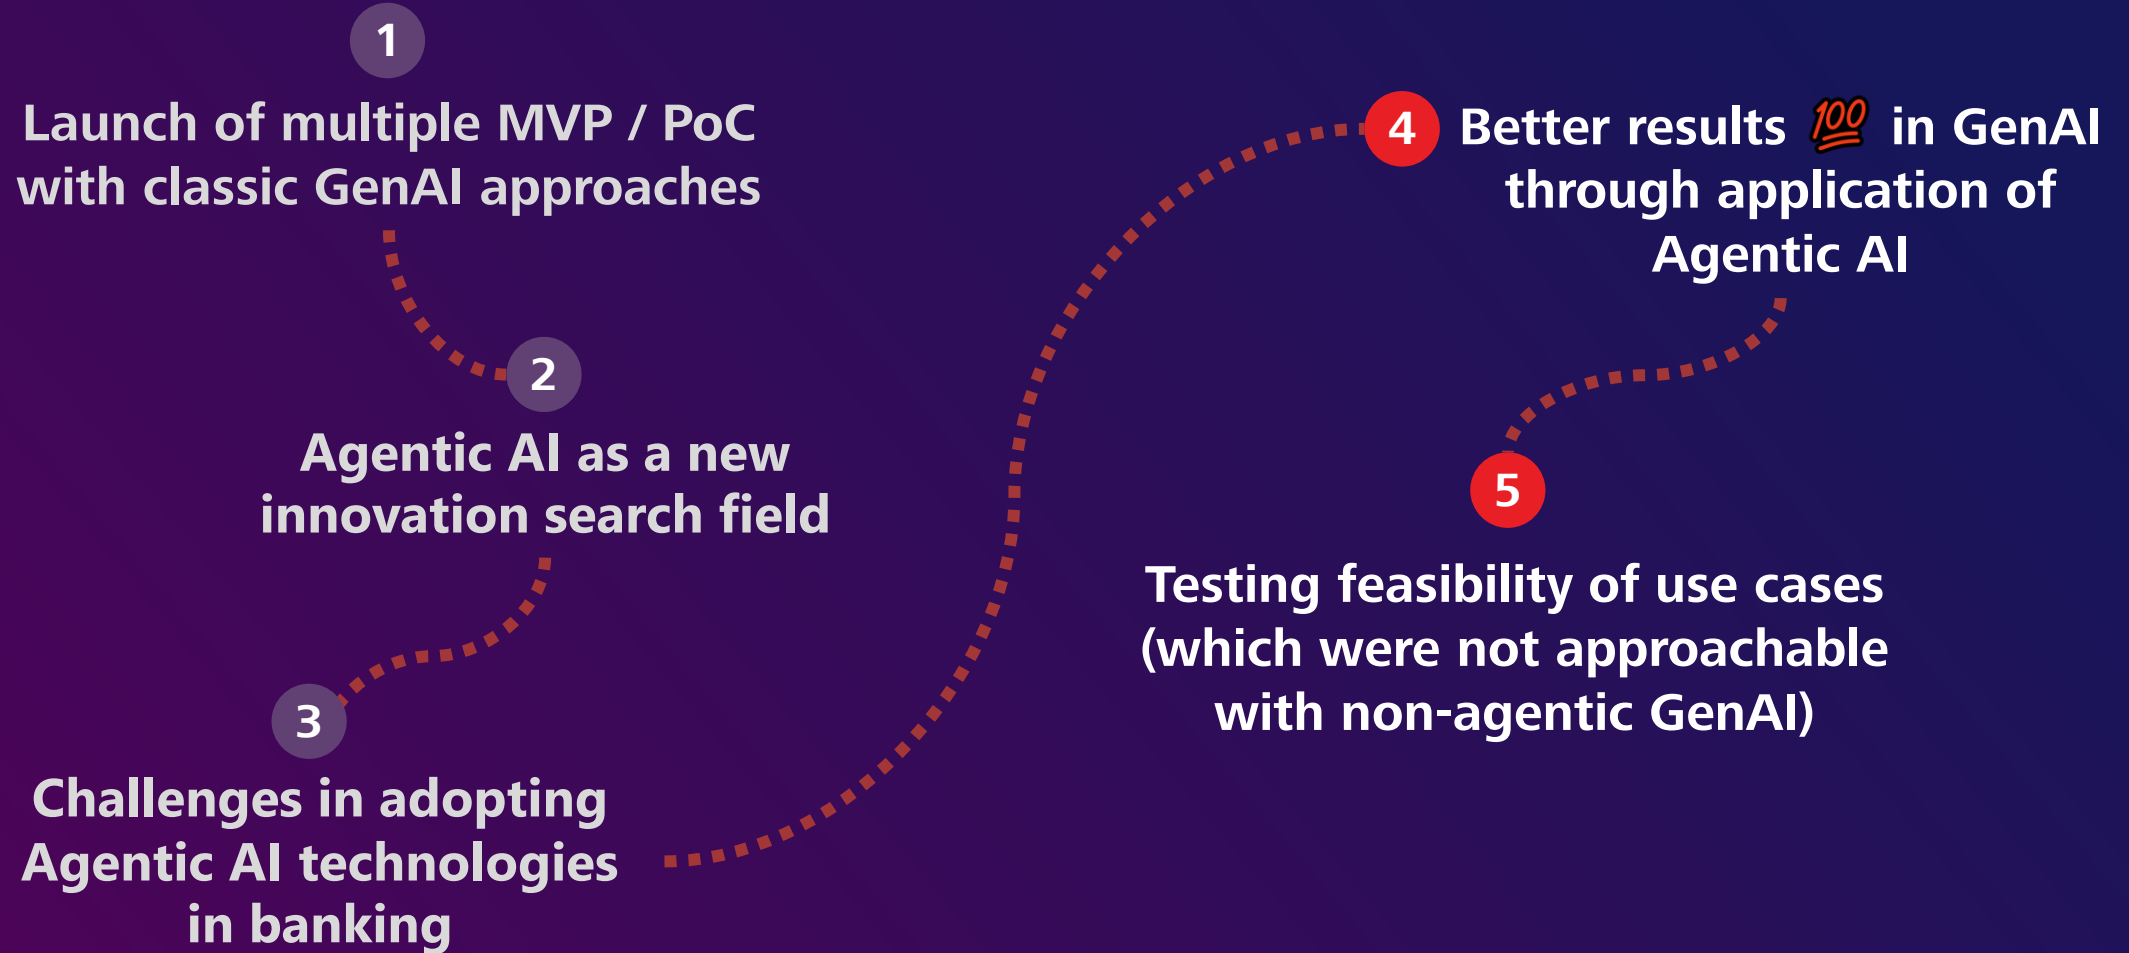

Most used **E-Banking**
in Switzerland (>2 Mio.)

Raiffeisen's GenAI Journey

Where Raiffeisen comes from....

...where we are going.

Our challenge

Starting position

Agentic AI is the next hype around the path to adoption by institutions. Raiffeisen sees many of opportunities and business challenges that can be addressed with these new capabilities.

Supported by the Microsoft tech stack or your own platforms you inspire with new solutions to adopt these new possibilities to gain effectivity and efficiency.

Objective

You address specific use cases to improve efficiency and customer experience in the banking sector. Develop innovative solutions using Agentic AI to enhance banking services.

Expectations

Show feasible approaches favorable using your tech stack or provided Microsoft tools like Copilot Studio or MS Azure. We expect information around the picked use case and its expected benefits.

**You can pick one of the following
use cases....**

01

Semantic Real Estate Search:

Create a agent driven chat-based app for customers to input preferences and/or images and search and display matching new listings.

02

Retirement Planning Chatbot:

Enhance a chatbot to provide retirement advice, projections and product recommendations using multimodal LLMs.

03

Augmenting Advisors:

Provide agents that support advisors during a meeting based on real-time data and client history.

04

Optimize meeting summaries with AI agents:

Develop an app to record, transcribe Swiss German audio, and summarize using Agentic AI Workflows that ensure accuracy and completeness.

05

ESG Research and Reporting:

Develop a system to analyze ESG factors using public information.

... or simply bring your own
idea of agentic AI driven
banking of the future 😊👉

Our focus lays on the technical implementation and creativity in problem-solving.

25% Innovation	20% Technical Implementation	20% User Experience	15% Impact & Relevance	10% Feasi- bility	10% Pitch
